A little bit about us...

We have been supplying play equipment to UK local authorities for over 60 years, we know how tough the kit needs to be!

mission: a contemporary, exhilarating play experience.

Designed for older children, mission offers testing physical play opportunities. Focusing on climbing, traversing, and descending in unique ways, **mission** invites children to take part in high energy invigorating play. Intended to keep them interested for extended playing time, it also keeps children active and fit.

mission is a fully modular play system with varying degrees of challenge, interspersed with resting surfaces, slides and glides. As well, there are also complementary individual play items such as a spring platform, curly stepping poles and a hammock.

Hanging Glide - Requiring upper body strength to hang, the glide runs down to a gentle stop spring, and a tether is incorporated to bring the trolley back to the start.

Banister rails - Ergonomic design gives an exhilarating curving ride from a high platform.

Flexi Rings - Individual flexible rubber hand rings provide a challenge that requires upper body strength.

Climbing Wall - Curving surfaces and small well-spaced grips make this a challenging traverse and a link between platforms.

Ropes and Nets - Incorporated are a range of rope play features, from a simple climbing rope to a twisting 3D net. An inclined V net provides a tightrope like play experience.

Choose your own colours - Standard colours for **mission** structural steel elements are Violet and Blue, but other colours can be used (prices on application).

Violet  Blue 

Tough aluminium uprights have been developed with four internal ribs giving more flexibility & enabling dynamic play activities. Also used for the main uprights, chosen for its extreme durability in the ground.

Personalise your mission...
Stencilled cut out panels, on selected units, allow for customised wording to be used at no extra cost.

Soft rubber has been used throughout. Main features are post & end caps with rings & grip ribs to provide safe 'holding on places'. A steel core ensures their durability.

Platforms & Panels are constructed from a core of exterior quality plywood. Covered in our unique polyurethane (PU) coating, 3mm thick, it seals out moisture for a long life with no maintenance. It has a soft cushioning effect & the textured surface provides grip even when wet.

Ghost

Ghost is our biggest standard mission unit but we can go much bigger if you want! It incorporates a wide range of play experiences from strenuous climbing and agility through to exhilarating rides on the curved banister rails. Being large, with a random layout, it keeps kids interested for extended playing time, there is always something new and exciting round the next corner!

Protocol

Taking agility and upper body strength to the next level, Protocol will challenge even the most confident child. Testing hand-eye coordination, the unit also incorporates our innovative spring board for big air fun as well as somewhere just to sit and chill.

Foxfire

Designed around a small circular traverse, Foxfire is great for game playing and keeping off the ground. Even at the end of the banister rails, it's just a couple of quick steps back onto the unit. For those who don't want to join in the game playing, the spin pole out on its own provides another distinct play space.

Target

Like its name, Target has a centre to aim for and consists of a maze of random platforms at different heights. Compact in design, it's ideal for small spaces and incorporates our exhilarating curved banister rails, spin pole and challenging V net climber. Make it to the centre and there are spaces to stand or sit and rest a while.

Incognito

The popular 10m long glide forms the focal point for Incognito. Not just a fun ride, the glide takes upper body strength to hold onto until the end, a great work out with a challenging route back to the start station. Start with a high bounce on the spring board, up the stepping poles, onto the platform and down the V net to start all over again.

Pursuit

Pursuit is a compact mission unit incorporating a challenging small circuit. A 3m hand ring traverse tests upper body strength, and our proper hammock aids rest and relaxation once completed. This combination of risk and rest is very popular with all ages, giving young people the self determination to play as and when they want.
