inspire

**Encourages
social
interaction &
co-operation**

Snug is a radical new approach to play equipment which changes the psychology of the playground.

**Transforms
the school
playground**

It consists of a family of large scale, modular play elements that children can use separately or together in any combination, creating a dynamic, exciting playscape - where they can have fun, explore and learn. Teachers can also use Snug as a creative learning resource across the curriculum. Requiring no installation, the Snug elements are soft and tactile, yet durable and waterproof.

**Inspires
children's
creativity**

**Provides a
learning
resource for
teachers**

**Stimulates
natural
exercise**

**Ideal for
children with
special needs**

**Supports
Every Child
Matters**

**Assists
teaching
outside the
classroom**

RoSPA
*The Royal Society for the
Prevention of Accidents*

Consultation with RoSPA (The Royal Society for the Prevention of Accidents) has led them to conclude that they "believe Snug is a product that is well suited to primary school playgrounds and is suitably safe.

colour

“I like the wiggly snake the best. We’ve even made it into our den!”

“You get the tree stump. And then I’ll give you the top in a minute”

colour

cone & bump

Loop

Made up of modular elements, the Loop can be used to construct curved play structures to encourage balancing games and create areas for socialising.

Cone

The Cone provides a meeting point and introduces a vertical structure to the playground. It can be ran around, jumped onto, hidden behind, and is created from tactile foam - making it perfect for hugging and bouncing off.

Bump

Perfect for jumping off, bouncing or rocking and spinning on. The Bump can be used to create pathways or linked to other elements using Noodles.

colour
 wave

“Be careful!
 Come away
 from the
 sharks!”

“Jump in
 the boat.
 We’re going
 on a big
 adventure!”

colour
 wall

Wave
 Versatile building units with two distinct sides – a softer waved surface and a hard flat side. Together they can be used to create platforms for performing and dancing, a lounging area, raised walkways, barriers and walls.

Wall
 Versatile and flexible, the Wall can be used horizontally and vertically. Stand it on its side to create a curved wall or a den, turn it on its back and it becomes a rocking cradle, or placed on its feet it becomes a tunnel or raised walkway.

colour

“Storytime’s much more exciting on our Treasure Island.”

Mound

Helps children experience different levels, slopes and terrains. The Mound dramatically transforms your playground landscape, creating small humps, large hills, extended ridges and valleys.

“Watch out - there are some giant spiders over there!”

colour

spider, pad & noodle

Noodle

Noodle

Offering unlimited possibilities, the Noodle can be used for connecting and building.

Spider

A versatile sculptural element made from light, durable foam material, the Spider can be used alone to create shapes or plugged into other elements, including the Pad, to create a safe haven.

Pad

Perfect for teaming with other elements, the Pad provides a robust but soft base for the spider, as well as the roof for the Loop circle or walls.

the snug kit

We recommend starting with a Snug kit, which has the right quantities to allow children to experiment with, and enjoy all elements and combinations. Additional elements can then be bought individually depending on popularity, usage and the setting.

Storage unit

the snug kit

SGU 900

Code	Product	QTY Per kit
SGV900	Wave	8
SGB900	Bump	6
SGL900	Loop consists of	1
SGL810	- Loop curve	14
SGL820	- Loop Connector Plug	1
SGL825	- Loop Connector Socket	1
SGL830	- Loop End Plug	1
SGL835	- Loop End Socket	1
SGC900	Cone	2
SGW900	Wall	4
SGP900	Pad	2
SGT 900	Spider	2
SGM900	Mound consists of	1
SGM840	Mound Quad	4
SGM830	Mound Ramp	4
SGN900	Noodle pack of 10	2
Additional optional extras		QTY
SGM820	Mound - Slab	1
SGM810	Mound - Platform	1
	Storage unit	1

our story

For over 15 years artists Snug & Outdoor have been producing imaginative bespoke designs for playgrounds. Generous funding and support from NESTA, Arts Council and the Esmée Fairbairn Foundation, enabled Snug & Outdoor to team up with the Design Laboratory and the Institute of Education to thoroughly research, prototype and test the Snug Kit in nursery, primary and special needs schools. Recognising the need to work closely with a manufacturer to realise Snug's full potential, in 2005 Snug & Outdoor joined forces with Sutcliffe Play, an internationally renowned, child-centred, play equipment designer and manufacturer.

Sutcliffe Play bring many years experience of producing quality play equipment, together with an impeccable reputation of working closely with both local authorities and schools. Together we now bring you Snug!
