Synthetic Surfacing / ChildsPlay®

A new addition to Notts Sport's range of products NottsSward Leisure is 100% Polypropylene and constructed using Permafresh Fibre™, which provides 100% effective control of dust mites, bacteria, mould, mildew and fungi.

Permafresh™ is infused into the fibres of the NottsSward Leisure during manufacture and permeates the surface throughout its lifetime. This provides the user with permanent and hygienic odour control, whilst ensuring freedom from bacteria and mould.

Add to that the fact that this surface is non sand-filled and you have the perfect solution for pool surrounds, boats, patios, roof gardens, crazy golf courses, exhibitions and of course both indoor and outdoor nursery and kindergarten play areas.

NottsSward Leisure is also available with a durable rubber backing (NottsSward Leisure RB) for areas where it's just impossible to glue the surface to the existing base.

So having the NottsSward Leisure RB as part of the range really increases the places where it can be used, making it possible to use the surface directly onto a stone base or onto expensive flooring you do not want to glue anything onto such as parquet flooring.

And, of course as you'd expect with Notts Sport, the NottsSward Leisure and NottsSward Leisure RB are both available in the usual range of 15 vibrant colours!
